

M U L T I C A N E M U L A T O R

Equipped with auto detection of the engine ECU in the following brands:
Renault, Citroen, Peugeot, Fiat, Alfa Romeo, Iveco.

It is an innovative product on the IMMO Automotive brand market.

The emulator automatically recognizes the brand and the type of the engine ECU.

It does not require the picking of any jumpers, which is what
differentiates it amongst other emulators.

Multi CAN emulator operates the engine ECU with a CAN speed 250kb & 500kb.

The CAN speed selected with jumper J1

M U L T I
C A N
E M U L A T O R

Fiat, Alfa Romeo, Iveco

CAN speed 250kB & 500kB

Method 1:

The engine ECU must be set to virgin – the engine ECU will learn the code itself.

Method 2:

The ISK code **22 22 22 22 22 22** must be inserted in the engine ECU.

Selecting CAN speed:

CAN 500kB J1– open

CAN 250kB J1– closed

Diode behavior:

- 1 long blink (1 sec.) – the engine ECU is ready, permission to start
- no blink – incorrect ISK, improper setting of the virgin mode, faulty plug-in of the emulator or incorrect choice of CAN speed.

Caution:

There is an occasional possibility of an overlap in the authorisation between BCU a ECU. In this case, remove the transponder from the key.

Fiat, Alfa Romeo, Iveco with CAN 500 & 250 kb/s VISTEON DCU 102

FLASH ST 10F276

1. The engine ECU must be set to virgin – the engine ECU will learn the code itself.
2. The ISK code 22 22 22 22 22 22 must be inserted in the engine ECU.

If you have any problem with entering ISK code please contact our support on Skype:
